## Artist Statement

Over the past 2 years I've been attending The Learning Connexion School of Creativity and Art to develop my creative skills. During this time I've discovered an exciting passion for landscape painting.

My background is in architectural draughting, which for me had a tightness and a need for accuracy that I found a bit stifling.

Painting however is another matter, and during my time at TLC I've developed a looseness and freedom with colour, which now enables me to represent my unique perspective on how I see the world.
